SONY MUSIC TO LAUNCH NET-BASED MUSIC DISTRIBUTION ON DEC 20
(Sony Music Entertainment (Japan) to launch Bit Music, a Web site designed to distribute 44 new Japanese music products, on 20 December 1999)
Asia Pulse, p n/a
December 01, 1999
WORD COUNT: 188

TEXT:

TOKYO, Dec 1 Asia Pulse - Sony Music Entertainment (Japan) Inc. (TSE:7930) will open a Web site on Dec. 20 to distribute 44 new Japanese music titles over the Internet, the company announced Tuesday.

Japan's top music firm will charge 350 yen per title.

The subsidiary of Sony Corp. (TSE6758) plans to start distributing new titles by its contracted artists at the same time as they release new CDs.

The new Net site, Bit Music, will be located at (<http://bit.sonymusic.co.jp/>). Consumers will be able to listen to new music over the Internet and download the titles. Payment can be made by credit card, prepaid cards and others.

Buyers will be able to listen to the music on their PCs or on portable players which are compatible with the standards of Secure Digital Music Initiative (SDMI), a body to protect the copyright of music distributed over the Net.

Sony's new Web site will be the first Net-based music distribution service based on SDMI protocols. To prevent illegal copying, purchasers will be able to copy the music from their PC to a player only once, the company said.

**PREPAID WEB-SURFING CARDS NOW AVAILABLE FOR EASY INTERNET ACCESS FROM PCs
AND VIDEO GAME BOXES; Seer and INFOgy Provide Revolutionary Internet
Access.**

Business Wire, p10081177
Oct 8, 1996

TEXT:

CARY, N.C. and PASADENA, Calif.--(BUSINESS WIRE)--Oct. 8, 1996-- Seer Technologies Inc. (NASDAQ:SEER) and INFOgy, Inc. announced the availability of a revolutionary Internet access solution that is cost-effective and easy to use. Developed using Seer-HPS, the new online access and real-time accounting system enables Internet service providers (ISPs) to control access to the Internet, without requiring users to purchase a monthly service contract, commit to a monthly minimum or provide credit card or registration information. The new service was successfully launched in Japan in July by the Tokyo Internet Corporation and will be available in the US market in late 1997. Seer-HPS was chosen over competitive products from TI and Forte to build the system.

"We're ready for the Internet explosion," commented Tatsuya Nakajima, Director, Tokyo Internet Corporation. "This new service opens doors to a totally new Internet business, allowing potentially millions of new customers to access the Internet without a complicated PC, tedious software installation and lengthy subscription processes."

"Tokyo was a great test market for us. With the exponential growth of the Internet, there is great international demand for Internet access. We feel there is a substantial US market and we are now expanding this offer to Internet service providers on an international basis," said Ko Ikudome, president of INFOgy, the California-based consultancy and development house.

The resulting application provides Internet access not only from a PC but through video game boxes. Unlike conventional dial-up access services, the new service requires only one telephone number for access anywhere in the state or country. After purchasing a pre-paid time card including both telephone and Internet service charges at a local music, game or convenience store, users simply scratch the cards to reveal a user ID and password. Users must have a video game box equipped with a CD-ROM drive and Internet browser software. Users simply insert the card and they get immediate Internet access for activities like web-surfing and email. Cards cost \$15 for 100 minutes of connect time.

"We needed to create an application that could scale quickly from thousands of users to millions of users," explains Ikudome. "We chose Seer because of its integrated development environment and were able to develop this complex application from models to code without buying multiple sets of tools."

Seer Technologies designs, develops, markets and supports software products and provides related services that enable its customers to build, distribute and manage large-scale, mission-critical information systems. Founded in 1990, the Company is headquartered outside North Carolina's Research Triangle and has offices throughout North and South America, Europe, Asia and Australia. For more information, visit the Seer Web site at <http://www.seer.com>.

INFOgy, Inc. was incorporated at the beginning of 1995 and provides information systems, software tools, state-of-the-art client/server technology, distributed RDBMS expertise and are internationally renowned

Ginger Roberts DeMille

for performance analysis and prediction. Its client base is diverse and covers many international corporations and government organizations including NTT Japan, Goldman Sachs, JPL, KPMG Peat Marwick and Lockheed Martin. Virgin Records America and Urocket in Joint Download Promotion with Secure Redemption System Developed by Supertracks.

Business Wire, p1873

Nov 15, 1999

TEXT:

LOS ANGELES--(BUSINESS WIRE)--Nov. 15, 1999--

Virgin Records America announced today a joint promotion with Urocket in support of NEC's new Home Music Studio PC. Virgin Records will be making available certain recordings for secure digital download over the Internet. The albums featured in the promotion will be accessed through Supertracks new Internet Music Card (IMC(TM)), which functions like a prepaid phone card, offering users a preset dollar value to spend online.

The IMC(TM) will be available with the purchase of NEC's Home Music Studio PCs.

IMCs(TM) will be redeemable with all NEC Home Music Studio PCs and will later be available for sale from Urocket and retail outlets. The music will be downloadable from Urocket's music portal, Urocketmusic.com. Fans will make their purchases through a rechargeable IMC(TM) - a secure redemption solution developed by Supertracks, a new company that specializes in developing and operating end-to-end secure solutions for the digital download of music (DDM). Supertracks' key focus is maximizing distribution elements including complete e-commerce solutions and promotions to support the retailer.

Rudy Burger, President and CEO of Urocket, stated, "Urocket's mission is to facilitate the migration of Internet music from the home office PC into the living room."

Ray Cooper, Co-President of Virgin Records, said, "We are pleased to be supporting NEC's Home Music Studio PC, and this promotion, as it allows us to make more of our music available for download in a secure technology for the first time."

Richard Cottrell, President of EMI Music Distribution, added, "Now that the technology is available, we are looking forward to developing many other secure promotions with retail."

The downloads will play on a specially developed version of the Winamp player, made secure by Supertracks licensing of Preview Systems new DDM platform integrating Preview's proven and powerful e-commerce engine with Intel's tamper-resistant, Software Integrity System. NEC Home Music Studio PC owners will receive a plug-in to Winamp that enables playback and makes it SDMI compliant. It is expected that this secure playback solution will be available for all configurations of PC by February 2000.

EMI Recorded Music, the third largest music company in the world, is an international music company with operations in more than 50 countries. EMI Recorded Music includes important local and international artists, including some of the biggest names in the recorded music industry. EMI has artists in every leading music genre, including pop, rock, jazz, classical, Latin, Christian, country, rap/urban and dance. The world famous labels include Capitol, Angel, Blue Note, EMI, Priority and Virgin. Its current roster includes approximately 1,500 artists who typically release more than 1,200 albums each year; last year EMI had 27 releases that sold in excess of one million units. EMI Music Publishing is the world's largest music publisher.

Pre-Paid Internet Access Patents Awarded to Interactive Media Works.
PR Newswire, p4237
Nov 2, 1998
TEXT:

Proven Utility of Long Distance Pre-Paid Cards to be Available on the Internet

OVERLAND PARK, Kan., Nov. 2 /PRNewswire/ -- Soon, all the promotional benefits of brand supported Pre-Paid Long Distance calling cards will be available on the exploding Internet medium, facilitating Sponsor objectives such as "driving traffic" to their Home Pages or providing "sampling" opportunities to subscription-based sites.

Over the past 90 days, Interactive Media Works (IMW) has been awarded United States Patents numbers 5,749,075; 5,774,869; and 5,806,043. The combined 70 Claims cover a broad range of applications, including:

-- the distribution of stand alone software allowing consumers to access

the Internet courtesy of a Sponsoring Brand. During a pre-determined amount of time, the consumer will log on using a unique Personal Identification Number (PIN) and/or Password and begin the "cruising" experience on the Sponsor's Home Page;

-- the collection of consumer provided information during the initial "registration" process, which will enable the Sponsor to team about and reward targeted consumer segments;

-- the distribution of a "hybrid" Calling Card (marketed under the sampleNET(TM) brand name by IMW), which allows the consumer to use

the

pre-determined amount of time for Long Distance calling or convert

all

or part of the time into Internet access time;

-- the ability to "re-fresh" the Internet access component by utilizing a

Credit Card, a 900, "pay-per-call" function (billed on Local telephone

bill), or by providing the Sponsor with additional information, which is rewarded with additional access time;

-- the incorporation of pre-addressed (via default URL) Internet access

time within Software Products, allowing the consumer the ability to directly access the software provider's site for on-line Assistance and Registration functions.

"In view of the current challenges being faced by Internet 'site owners' to drive traffic to their Home Pages, we anticipate a great deal of interest in the potential of these applications," said Adrian Toader, President and CEO of IMW. "The benefits of our products should get the attention of three major segments of the Internet Industry: (1) the Consumer Brands companies that now have a shot at reaching out to the 60% of the market that do not currently have Internet access and introducing them to the medium via their Home Page and courtesy of their sponsorship; (2) the aspiring 'Portals' that will now have the opportunity to swing existing users to their URL via free access trials; and (3) Software Manufacturers that can now integrate the more cost effective 'on-line assistance' services into their products, by providing pre-determined amounts of Internet access time," he added.

IMW had actually introduced and tested a version of their

Ginger Roberts DeMille

sampleNET(TM) product in 1996 with a dozen customers, including Procter & Gamble, utilizing the NETCOM access network, as it's ISP partner. For it's creativity, IMW was awarded the Industry's highest award for Innovation by the Interactive Services Association (ISA), now known as the Internet Alliance (IA).

The company is currently negotiating with a number of national ISPs for providing the patented functionality on their access networks. "We view the 'long term' evolution of the Internet's access and transport components as following the Long Distance model, where the current large, national ISPs, like AOL, UUNET, PSI Net, and Earthlink, will provide more and more 'access re-sale' or 'private label' opportunities to companies interested in driving traffic to their sites, on an on-going basis. If you also believe that the current 'flat fee' model (equivalent to a 'private line' in the voice industry) will give out to the 'measured/usage based' alternative, than the value of access time sponsorship on the Internet will go up ten fold!" concluded Mr. Toader.

In addition to finalizing their selection of an Internet access partner for their own product offering, IMW will begin to actively pursue licensing opportunities aimed at stimulating the growth of these type of applications in the industry.

Interactive Media Works, based in Overland Park, Kan., is a leading interactive marketing and technologies company. Headed by former Sprint TeleMedia founder and executive Adrian Toader, IMW offers marketing and promotional agencies and their clients one-stop-shopping of turn-key interactive response applications. Through its proprietary technology platform, IMW creates fast, effective, and measurable promotions for its clients through the utilization of the Internet, 800 numbers, fax, and other new media.

New Series of Star Trek(TM) AT&T PrePaid Cards Announced.

PR Newswire, p4053

Nov 2, 1998

TEXT:

Exciting Trip to 'Star Trek: The Experience' at the Las Vegas Hilton and Casino Offered During Limited-Time Promotion

BASKING RIDGE, N.J., Nov. 2 /PRNewswire/ -- AT&T is announcing a new series of four AT&T PrePaid Cards today featuring exclusive images from Paramount Pictures' ninth Star Trek(TM) movie, "Star Trek: Insurrection(TM)," coming to theatres across the U.S. on December 11. The new cards make it easy and fun for Trekkers(TM) and non-Trekkers alike to connect to other Earthlings.

Now available in select retail outlets nationwide, the new "Star Trek: Insurrection" AT&T PrePaid Cards feature scenes from the new movie and make great gifts that guarantee callers will always be connected to the AT&T Network.

To help kick-off the new series of Star Trek(TM) AT&T PrePaid Cards, a special promotion will run from November 1, 1998, through January 31, 1999. When consumers enter the PIN number found on the back of the "Star Trek: Insurrection" AT&T PrePaid Card, they will hear a message telling them if they have won and a toll-free number to call to claim their prize. A variety of prizes will be awarded, including one Grand Prize of an all-expenses-paid trip for two to the "Star Trek: The Experience" attraction at the Las Vegas Hilton and Casino in Las Vegas, Nevada. Complete details on the promotion are available wherever "Star Trek: Insurrection" AT&T PrePaid Cards are on sale.

The four "Star Trek: Insurrection" AT&T PrePaid Cards, available in 15-, 30-, 60- and 100-minute denominations, feature exclusive images from the new movie, including some familiar faces like "William Riker," "Geordi La Forge" and "Data," as well as some new ones. The popular cards can be used to call anywhere in the U.S. and to more than 200 countries.

True "Star Trek" fans can ensure that they will be among the first to get the cards by ordering now by calling 1-800-437-0973, ext. 62369. All four cards can also be seen and ordered online, beginning tomorrow, on AT&T's web site at www.att.com/prepaidcard/.

"Prepaid cards are one of the fastest-growing communications products, with more and more people using them as part of their regular communication routine," said Mark Evans, general manager for AT&T PrePaid Cards. "The AT&T name on our cards assures customers that they will receive the high-quality service they are paying for. We're extremely excited about the new cards and working with Paramount to support the latest film in the 'Star Trek' family -- 'Star Trek: Insurrection'."

When the cards go on sale the first week of November, they will be available in Spencer Gift stores nationwide, participating on-campus Barnes & Noble bookstores and Chevron convenience stores, as well as AT&T Stores nationwide.

AT&T PrePaid Cards are an easy, convenient way to call from any touch-tone phone. Calls always travel on the AT&T Network, and the Network even keeps track of the balance of minutes left on the card. To use a prepaid card, customers simply dial an 800 number, enter their PIN, hear how many minutes remain on the card, then dial the number.

Star Trek Facts:

The original "Star Trek" series debuted in September 1966, and the 79 episodes are currently airing on the Sci-Fi Network(TM) and in 75 other

Ginger Roberts DeMille

countries. "Star Trek: The Next Generation(TM)" is in syndication in 218 U.S. markets and more than 80 countries.

"Star Trek: Deep Space Nine(TM)" is seen in over 207 U.S. markets and 76 other countries. "Star Trek: Voyager(TM)" debuted on the new United Paramount Network in January, 1995, and quickly became the number one series on the network, with over eight million viewers weekly.

To date, the eight "Star Trek" motion pictures have taken in three-quarters of a billion dollars in North America alone.

There are nearly 300 works of fiction and nonfiction based on the four TV series, with 70 million copies now in print. "Star Trek" books hold the record for the longest streak of consecutive New York Times bestsellers, with 46 paperbacks over a more than six-year period.

Retailers interested in selling "Star Trek" AT&T PrePaid Cards can call 1-800-448-3127 for more information. The "Star Trek" name and logos were made available to AT&T through an arrangement with Future Call Company, Inc., an official licensee of Viacom Consumer Products, the licensing division of Paramount Pictures.

About AT&T

AT&T is the world's premier voice and data communications company, serving more than 80 million customers, including consumers, businesses and government. With annual revenues of more than \$51 billion and 119,000 employees, AT&T provides services to more than 280 countries and territories around the world. More information on AT&T is available online at www.att.com/. More information on AT&T PrePaid Cards is available online at www.att.com/prepaidcard/.

Viacom Consumer Products merchandises properties on behalf of Paramount Pictures, Paramount Television, Simon & Schuster and Viacom Productions as well as third-party properties. Viacom Consumer Products, a unit of Viacom Entertainment Group, is a subsidiary of Viacom Inc.

INTERACTIVE MEDIA WORKS DEBUTS sampleNETsm; Advertisers to give consumers instant prepaid access to the Web through their own home pages; IMW's Proprietary Software Also Provides Web Sites With Breakthrough Tracking Research of Online Users.

Business Wire, p7171118
July 17, 1995

TEXT:

OVERLAND PARK, Kansas--(BUSINESS WIRE)--July 17, 1995--Marking a quantum leap in Internet access, online advertisers will take the lead in providing consumers with the easiest World Wide Web connections ever, thanks to Interactive Media Works' new sampleNETsm (patent pending) software package. A breakthrough browser that automatically connects to the Internet via an advertiser's home page, sampleNETsm not only provides marketers with a simple method of driving both experienced Web surfers and novices to any Internet site, but also generates repeat visits - and actually measures consumer usage, page by page and site by site.

Via IMW's proprietary technology platform, sampleNETsm marries the proven promotional abilities of pre-paid long-distance phone calling cards with the unprecedented interactivity of the World Wide Web. The result: a revolutionary premium item that gives the consumer a free, pre-determined amount of Internet access time (30, 60 or 90 minutes) through the advertiser's own Web site. The disk is also renewable for additional time, providing marketers with repeat impressions each time the consumer logs on. And sampleNETsm also allows advertisers to turn their Web sites into marketing research tools: consumers provide basic demographic information upon initial log-on, and their subsequent usage can then be tracked by address and time, no matter where they go on the Web.

"We formed Interactive Media Works last year to provide marketers with strategic links across different interactive media, and sampleNETsm is the culmination of our initial efforts," stated IMW president and CEO Adrian Toader. "In scores of talks with leading advertisers, we heard over and over again that their greatest needs on the Internet were driving consumers to home pages and measuring Web activity. So we committed ourselves at IMW to translating the proven value of pre-paid phone cards to another phone-like interactive technology - the Internet."

sampleNETsm provides complete World Wide Web surfing capabilities through an Internet browser. Each 3.5-inch diskett, in either Windows or Macintosh version, has easy-to-follow loading instructions, connects through an 800 number, and is tagged with a unique Personal Identification Number. This PIN number identifies the specific promotion involved on IMW's proprietary server and links the consumer to the advertiser's home pages.

Consumers first see a customized greeting page containing the advertiser's logo and tag line, and are then prompted to enter their name, address, age and sex. Once they complete this form, they can be linked to up to three additional customized screens, containing such content as new product information, additional research questions or information on sweepstakes, sponsorships, etc. The next connection is to the advertiser's home page.

Once the predetermined access time is about to end, the advertiser can use another customized screen to offer the consumer additional time - perhaps in exchange for downloading a coupon, or answering additional research questions.

To help bring word of sampleNETsm to ad agencies, national advertisers

Ginger Roberts DeMille

and research firms, Interactive Media Works has just opened an office in New York City and named former CBS ad sales executive Lawrence D. Ostrow as Managing Director, East.

Interactive Media Works, based in Overland Park, KS, specializes in direct response and strategic marketing applications of interactive media and other new technologies. Headed by former Sprint TeleMedia founder and executive Adrian Toader, IMW offers consumer goods and entertainment marketers one-stop shopping - including design, deployment and analysis - of turn-key interactive promotional packages. Through a proprietary technology platform, IMW creates fast, effective, and measurable promotions for its clients through the utilization of the Internet, 800 and 900 numbers, phone cards, fax and other new media.

Once the predetermined access time is about to end, the advertiser can use another customized screen to offer the consumer additional time - perhaps in exchange for downloading a coupon, or answering additional research questions.

To help bring word of sampleNETsm to ad agencies, national advertisers and research firms, **Interactive Media Works** has just opened an office in New York City and named former CBS ad sales executive Lawrence D. Ostrow as Managing Director, East.

Interactive Media Works, based in Overland Park, KS, specializes in direct response and strategic marketing applications of interactive media and other new technologies. Headed by former Sprint TeleMedia founder and executive Adrian Toader, IMW offers consumer goods and entertainment marketers one-stop shopping - including design, deployment and analysis - of turn-key interactive promotional packages. Through a proprietary technology platform, IMW creates fast, effective, and measurable promotions for its clients through the utilization of the Internet, 800 and 900 numbers, phone cards, fax and other new media.

MICROSOFT AND VISA IN SOFTWARE DEAL

New York Times, Col. 1, Pg. 2, Sec. D

Wednesday November 9 1994

DOCUMENT TYPE: Newspaper JOURNAL CODE: NYT LANGUAGE: English

RECORD TYPE: Abstract

ABSTRACT:

Ginger Roberts DeMille

Microsoft Corp enters agreement with Visa International to provide technology, using encryption technology from RSA Data Security Inc, for secure electronic bank-card transactions across public and private computer networks; Microsoft's secure transaction technology will consist of software that supports both the **card** -holder and **merchant** side of a **transaction** and works with the Viasnet payment system; Microsoft executive says that for software firm, secure transactions are part of broad vision of the information highway; adds, however, that technology would not be limited to the **Internet** but would also **work** on commercial services like Prodigy or America Online; Richard Crone, director of electronic banking for KPMP Peak Marwick, is somewhat skeptical of venture; says more viable approach to on-line commerce was offered by First Virtual Holdings, which began service over the Internet last month (M)
